Scheme Inception : - February 24,2005. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark: ^ Additional Benchmark: TRI – Total Return Index. # KOTAK CONTRA FUND

An open ended equity Scheme following contrarian investment strategy

**Investment Objective:** The investment objective of the Scheme is to generate capital appreciation from a diversified portfolio of equity and equity related instruments. The Scheme will invest in stocks of companies, which are fundamentally sound but are undervalued. Undervalued stocks are stocks of those companies whose true long term potential is not yet recognised by the market. At times, the broad market takes time to appreciate the long-term potential of some fundamentally sound companies. Stocks of such companies are traded at prices below their intrinsic value and are regarded as undervalued stocks. We believe that, over a period of time, the price of a stock reflects the intrinsic value of the underlying company. Thus, the moving up of the price of the undervalued stock towards its intrinsic value will help us generate capital appreciation for investors. There is no assurance that the investment objective of the Scheme will be achieved.

Scheme Inception : - October 28, 2024. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP Performance is for Regular Plan – Growth Option** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. Scheme Inception : - August 03, 2018. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. The SIP performance details provided herein are of Regular Plan - Growth Option Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. TRI – Total Return Index, in terms of para 6.14 of SEBI Master circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, the performance of the scheme is benchmarked to the Total Return variant (TRI) of the Benchmark Index instead of Price Return Variant (PRI). Alpha is difference of scheme return with benchmark return. \* All payouts during the period have been reinvested in the units of the scheme at the then prevailing NAV. Source: ICRA MFI Explorer. (N) Fully or Partly blocked against Interest Rate Swap (IRS) (N) This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be less than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments. \* For Fund Manager experience, please refer page 151-155 & 169-173. Scheme Inception: - October 13, 2014. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Scheme Inception date is 25/11/1999 and Scheme Inception date of Kotak Aggressive Hybrid Fund (Erstwhile Known As Kotak Equity Hybrid Fund) - Regular plan growth option inception date is 05/11/2014. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. TRI – Total Return Index, In terms of para 6.14 of SEBI Master circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, the performance of the scheme is benchmarked to the Total Return variant (TRI) of the Benchmark Index instead of Price Return Variant (PRI). (^) Fully or Partly blocked against Interest Rate Swap (IRS) (^) This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments. **Investment Objective:** The investment objective of the Scheme is to enhance returns over a portfolio of debt instruments with a moderate exposure in equity and equity related instruments. By investing in debt securities, the Scheme will aim at generating regular returns, while enhancement of return is intended through investing in equity and equity related securities. The Scheme may also use various derivative and hedging products from time to time, in the manner permitted by SEBI. However, there is no assurance that the objective of the scheme will be achieved.

Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. Alpha is difference of scheme return with benchmark return. \*All payouts during the period have been reinvested in the units of the scheme at the then prevailing NAV. Source: ICRA MFI Explorer. (^) Fully or Party blocked against Interest Rate Swap (IRS) (^) This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments. \*For Fund Manager experience, please refer page 151-155 & 169-173. \*\*Total Expense Ratio includes applicable GST. Scheme Inception :- July 14, 2003. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option.** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. Scheme Inception : - March 06, 2008. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. Alpha is difference of scheme return with benchmark return. \* All payouts during the period have been reinvested in the units of the scheme at the then prevailing NAV. Source: ICRA MFI Explorer. (^) Fully or Partly blocked against Interest Rate Swap (IRS) (^) This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments. \*For Fund Manager experience, please refer page 151-155 & 169-173. \*\*Total Expense Ratio includes applicable GST. Scheme Inception : - September 21, 2007. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark: ^ Additional Benchmark: Alpha is difference of scheme return with benchmark return. \*All payments during the period have been reinvested in the units of the scheme at the then prevailing NAV. Source: ICRA MFI Explorer. (^) Fully or Party blocked against Interest Rate Swap (IRS). (^) This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments. \*For Fund Manager experience, please refer page 151-155 & 169-173. \*\*Total Expense Ratio includes applicable GST. ### Benchmark

For latest Riskometer, investors may refer to an addendum issued or updated on website at [www.kotakmf.com](http://www.kotakmf.com)

Scheme Inception : - May 02,2002. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. Alpha is difference of scheme return with benchmark return. \*All payouts during the period have been reinvested in the units of the scheme at the then prevailing NAV. Source: ICRA MFI Explorer. (^) Fully or Party blocked against Interest Rate Swap (IRS) (^)This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments. \*For Fund Manager experience, please refer page 151-155 & 169-173. \*\*Total Expense Ratio includes applicable GST. **Scheme Inception :** - May 26, 2008. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. Alpha is difference of scheme return with benchmark return. \*All payouts during the period have been reinvested in the units of the scheme at the then prevailing NAV. Source: ICRA MFI Explorer. (^) Fully or Party blocked against Interest Rate Swap (IRS) (^) This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments. \*\*Existing investment in REITs held by debt schemes of Mutual Funds as on January 31, 2026, is grandfathered \*For Fund Manager experience, please refer page 151-155 & 169-173. \*\*Total Expense Ratio includes applicable GST. Scheme Inception : - May 14, 2019. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark: ^ Additional Benchmark. Alpha is difference of scheme return with benchmark return. \* All payouts during the period have been reinvested in the units of the scheme at the then prevailing NAV. Source: ICRA MFI Explorer. (^) Fully or Partly blocked against Interest Rate Swap (IRS) (^) This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unjustified portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments. \*For Fund Manager experience, please refer page 151-155 & 169-173. \*\*Total Expense Ratio includes applicable GST. Scheme Inception : - December 29, 1998. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. Alpha is difference of scheme return with benchmark return. \*All payouts during the period have been reinvested in the units of the scheme at the then prevailing NAV. Source: ICRA MFI Explorer. (^) Fully or Party blocked against Interest Rate Swap (IRS). (^) This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments. \*For Fund Manager experience, please refer page 151-155 & 169-173. \*\*Total Expense Ratio includes applicable GST. **Scheme Inception** : December 29, 1998. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. Scheme Inception: - November 25,1999. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. Scheme Inception : - August 09, 2004. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP Performance is for Regular Plan – Growth Option** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. TRI – Total Return Index, In terms of para 6.14 of SEBI Master circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, the performance of the scheme is benchmarked to the Total Return variant (TRI) of the Benchmark Index instead of Price Return Variant (PRI).
